

## PCC Flex Self-Assessment – Fall 2020

### Instructions

#### What?

This self-assessment activity will ask you to **evaluate your own performance** on 7 core skills that we want all PCC students to develop throughout their education here. In particular, we want to know how you feel you have performed in this PCC Flex class—you will rate yourself according to your own skill level and overall performance throughout this learning experience.

#### Why?

This is an opportunity for you to reflect on your own learning and growth this semester, which will help you better understand what areas you may need to work on more in the future as well as help us understand what improvements we might make to course content and instruction.

#### Be Honest!

Honesty is extremely important here, and therefore your responses will be anonymous! Please consider each statement carefully and select the one that most accurately describes your skill level and performance in this PCC Flex class.
